

SREEHARI PAVITHRAN

Data Analyst | SQL • Python • Tableau • Data Validation & Experimentation

sreehari.pavithran10@gmail.com | +91-6282709650 | [LinkedIn](#) | [GitHub](#)

Nationality: Indian | Visa Status: Seeking UAE Employment Visa (Relocation Ready)

PROFESSIONAL SUMMARY

Data Analyst with 3.5+ years independently building, validating, and automating SQL/Python data pipelines across US banking (Axos Bank & Axos Clearing) and Fortune 500 CPG (Fortune Brands) platforms — without relying on engineering support. Currently pursuing a UGC-entitled MBA in Business Analytics (MAHE) built for working professionals, with graduate coursework in experimental design, hypothesis testing, and statistical significance. Skilled in SQL (complex joins, window functions, CTEs), Python, and Tableau, with a track record of turning technical findings into clear, decision-ready recommendations for non-technical stakeholders. Seeking to bring this analytical rigor and independent data ownership to an experimentation-focused Data Analyst role in the UAE.

CORE SKILLS

Data Analysis & Visualization: SQL (Advanced Joins, Window Functions, CTEs), Python (Pandas, NumPy, Matplotlib, Seaborn), Tableau, Microsoft Excel

Statistics & Experimentation (MBA Coursework): A/B Testing, Hypothesis Testing, Experimental Design, Statistical Significance, Sample Sizing

Databases & Data Platforms: Snowflake, DBT, MS SQL Server (SSMS, SSRS), MySQL, T-SQL, Azure Data Studio, vs code

Data Validation & Automation: Source-to-Target Validation, Data Reconciliation, KPI/Metric Validation, Snowflake Streamlit, Selenium, Jira, GitHub

PROFESSIONAL EXPERIENCE

Data Radian Technologies Pvt Ltd — Client: Fortune Brands, USA *Hyderabad, India (Remote)*

Data Governance Analyst *Apr 2026 – Present*

- Lead the Data Product Certification function within the Governance team, certifying every Business Vault object using a multi-dimensional scoring framework covering data consistency, validity, value/data type, completeness, business relevance, and KPI field integrity.
- Identify PII fields across Business Vault and Infomart models and enforce masking controls as part of the certification process, strengthening data privacy and regulatory compliance.
- Automated certification scoring, workflows, and reporting using Snowflake, Python, and Snowflake Streamlit, cutting manual review effort and improving audit traceability of governance decisions.
- Partner with data modelers, architects, developers, and QA to remediate quality gaps and drive model improvements against established data governance standards.

Data Quality Analyst *Apr 2025 – Apr 2026*

- Delivered end-to-end data quality validation, testing, and certification for an enterprise DataVault 2.0 platform (Snowflake, SQL, DBT), consistently achieving >95% on-time model certification.
- Validated data flow across Source → Raw Vault → Business Vault → Infomart → Tableau → Certified layers
- Tested Tableau dashboards end-to-end and logged defects with SQL evidence in Jira, resolving over 90% of issues before certification while maintaining >95% compliance with naming and modeling standards.

Quinte Financial Technologies, Inc. — Client: Axos Bank & Axos Clearing, USA *Chennai, India (On-site)*

Senior Data Analyst *Aug 2024 – Apr 2025*

Data Analyst *Nov 2022 – Aug 2024*

- Delivered risk analytics and reporting for Governance, Risk & Compliance (BSA/AML) functions across Axos Bank and Axos Clearing, partnering with senior and ERM executives to lift compliance audit scores by 15% and cut compliance breaches by 30%.
- Built a Tableau-based Transition Matrix enabling ERM teams to review at-risk customers in bulk instead of individually, cutting review time by over 60% and improving data-capture accuracy from 60% to 85%.
- Partnered with Enterprise Data Warehouse and Data Engineering teams to strengthen ETL pipelines, optimizing SQL Server stored procedures and Python scripts to accelerate data availability for risk analytics and regulatory reporting.
- Conducted UAT (Python, SQL, DBT) and built data validation frameworks and reconciliation dashboards comparing source vs. pre-production environments to detect discrepancies and ensure data integrity across pipelines.
- Automated Python-based extraction of SQL logic across multiple Tableau workbooks (+80% retrieval efficiency) and engineered Selenium-based automation for Axos Clearing operational data extraction, removing manual effort from compliance monitoring.

EDUCATION & CERTIFICATION

MBA in Business Analytics — MAHE, Online (UGC-Entitled, NAAC A++) *In Progress – Expected Oct 2027*

PG Diploma in Data and Business Analytics — Mahatma Gandhi University *2021 – 2022*

B.Sc. Physics — Deva Matha College (affiliated to Mahatma Gandhi University) *2017 – 2020*
